

KPI – Change Management

Copilot Workshop

Request information on the Copilot for Microsoft 365 online Workshop

Roles

Effective change management requires input from:

Change management lead	IT support
HR personnel	Executive sponsors
Department managers	Program manager

By managing transitions, engaging stakeholders, and reducing resistance, effective change management helps maintain operational stability and encourages smooth adoption of new practices.

How Microsoft Copilot can help improve change management

Encourage adoption

- Provide clear, concise change communication
- Track progress on training and feedback

Reduce resistance

- Gather real-time employee feedback
- Create adaptive strategies based on input
- Improve response to concerns with actions

Foster collaboration

- Create channels for stakeholder involvement
- Streamline the change request process
- Facilitate team-wide communication and alignment
